

Conifex Launches Partnership Agreement for Youth Development

Our name is a combination of the words “Conifer” and “Excellence”, and excellence is just what we strive to achieve — in our fibre, our products, our partners, and most importantly in our greatest resource, the people who work for us. Established in 2008, our objective is to build a premier, next-generation forest company that is a world leader in responsibly maximizing fiber value.

Conifex has been involved in many initiatives to support families and their communities. We believe that when you invest in resources to support young children and parents, the returns and benefits are significant often leading to better academic success, higher earnings and better health.

In conjunction with the Play, Learn, Grow Together Foundation, Conifex has launched a partnership agreement with the Mackenzie Public Library in the City of Mackenzie, BC, which aims to intensify early childhood development for youth at home. A project document will be used to guide the collaboration and electronic youth tablets will be provided to support learning in effort to enhance foundational skills for children ranging in age three to eight years old.

The goal is to create a lasting youth development initiative to foster early childhood learning for youth in the community in support of future job growth and economical sustainability in the community of Mackenzie, BC.
